Copy Editing by Kimberly Mountjoy, Lindsay Gibson,
and anonymous patients from all over the world

The cover Bartonella samples are courtesy of Julie Bradley (NC State University, Intracellular Pathogens Research Laboratory). Her assistance in offering samples and explaining IFA, fluorescence, cell lines and computer enlargement was deeply appreciated.

Many thanks for direct and indirect help from the father of modern Bartonella science, research clinician Dr. Edward Breitschwerdt. He has authored about 300 peer-reviewed papers and wisely put Bartonella front and center, not as an absurd “co-infection,” but an infection with more vectors than any infection on earth. From this researcher with Galaxy Diagnostics we look forward to many more discoveries each year.

Wholesale discount requires purchase of at least twenty copies and can be in five book units. Fax request to (239) 304-1987 and (239) 263-6760.

*To my beloved friends in USA prisons—
Mike, Wayne, James, Bone C., Thaddeus, Julio and so many others—
with a hope we will end our leadership as the PRISON NATION,
and lead in liberty and not inmate numbers.*

*Let our nation return to timely trials,
end cruel and unusually excessive sentences,
allow the poor to have a good defense,
and may our peace officers never exceed the facts.*

***Let our prisons never have any element of torture—
the time is already a torture.***

*And to all my many children,
some by blood and some by care.*

*Parenting is impossible,
but I never favored the easy road.*

Thank you for making life so meaningful.

Introduction

I have been studying Bartonella almost full-time for many years. While I know some very select agents for treating Bartonella we still have many issues that limit application of effective care throughout the world.

Further, the number of true experts on Bartonella, and who have read most of the publications in English print, is possibly under a dozen individuals.

Finally, Bartonella has huge impacts in human biochemistry, hormones, sleep, sleep quality, personality, insight, hatred, agitation, rigidity, sadness, body sensations, tissue and organs. You cannot do one test and determine if Bartonella is present in either an animal or a human. I wish such a comfortable myth was true, but it is just old and ineffective medicine.

The references that follow are a small sample of materials related to this infection.

This book is written for individuals who have a master's degree, a PhD or MD in the medical sciences. It is also only for those doing research on these infections. If you are not trained at least at the master's level in mammalian related science, this text is not for you.

A Sample of Other Books by Dr. Schaller

This 800 page book contains a hundred useful treatment testing and treatment pearls. However, it does not give one size fits all “mill medicine” treatments. It also includes advanced and comprehensive diagnostic checklists to prevent health care workers from missing Bartonella, Babesia and Lyme disease. Veteran physicians and functional medicine practitioners report they are learning a great deal from this book. It also shows that very few healers are able to read full time to reach tomorrow’s medical care now, and Dr. Schaller shows he is one of them by clear broad thinking and thousands of references. His primary clinical pearls are in the first 120 pages.

FIELD SOBRIETY TESTING IS JUNK SCIENCE

A "BEST DOCTOR" AND "TOP PHYSICIAN"
SHOWS WHY POLICE SHOULD NOT PERFORM
ADVANCED NEUROLOGY TESTING

Which One is Qualified to Practice
Advanced Neurology Exams?

INCLUDING A FINAL CHAPTER:
A POWERFUL WARNING TO REPEAT & SERIOUS DUI OFFENDERS

This fascinating book appeals to all peace officers, legislatures, and concerned citizens to rethink the science of these super medical examinations which help save lives, **but also often allow for many to be placed under arrest for over 500 medical problems.**

JAMES SCHALLER, M.D.

The Diagnosis and Treatment of
Babesia

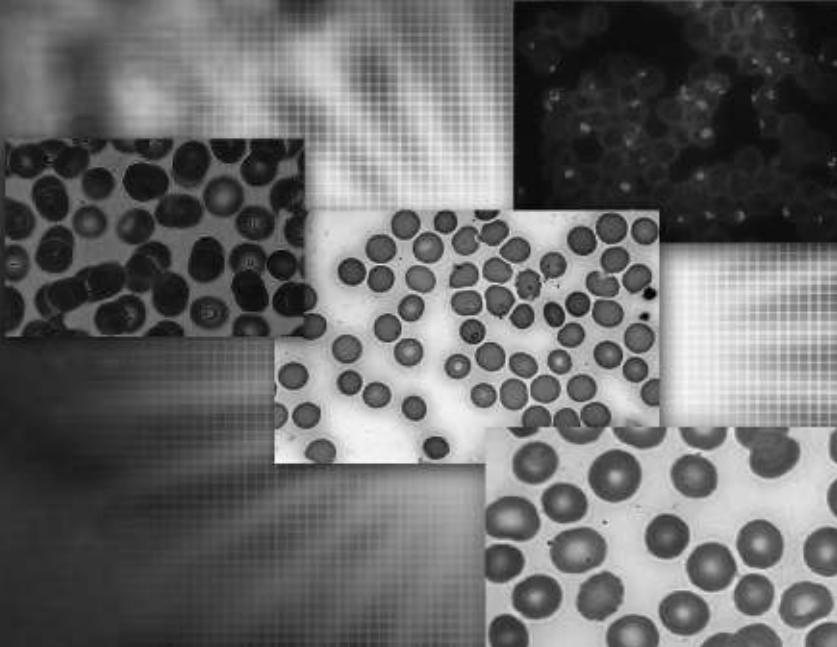

Lyme's Cruel Cousin: the OTHER Tick-borne Infection

This large textbook is clear and easy to read. It is really three books. While some points are partially outdated since 2006, much would be considered new to most readers.

JAMES SCHALLER, M.D.

**A Laboratory Guide
to Human Babesia
Hematology Forms**

The only hematology book exclusively dedicated to Babesia.

Artemisinin, Artesunate, Artemisinic Acid and Other Derivatives of Artemisia Used for Malaria, Babesia and Cancer

**A Health Care Practitioner's Guide to Dosage,
Side Effects, Effectiveness, Toxicity and Interactions.
A Review of the Research on the Most Common
Clinical Artemisia Medications.**

JAMES SCHALLER, M.D.

The most up-to-date academic and patient-centered book
on practical Artemisia Babesia issues.

BABESIA UPDATE 2009

**Routine and Advanced Testing Often Fail
Standard Treatments Do Not Cure**

A Cause of Excess Weight, Migraines and Fatigue?

JAMES SCHALLER, M.D.

WITH RANDALL BLACKWELL

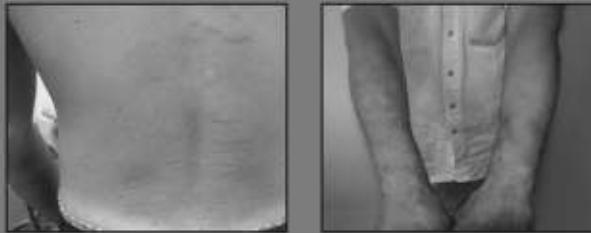

HARD COVER EDITION

A book with advanced research based information, that moves Babesia medicine into a new decade. It presents highly practical information on ways to detect Babesia that are not mere IgM/G titer tests. Learn how to detect new species being discovered routinely and which seriously undermine function. This text also discusses why some individuals do not experience the easy and fast cure promised in other writings.

JAMES SCHALLER, M.D.

The Diagnosis, Treatment and Prevention of **Bartonella**

***Atypical Bartonella Treatment Failures and
40 Hypothetical Physical Exam Findings***

Bartonella diagnosis is very complex. This current text creatively uses a new set of tools to assist in diagnosis based on solid research of blood vessel and skin augmentation chemicals created by Bartonella. It literally creates a new Bartonella physical exam. This book helps with limited basic lab testing, and **prevents the use of routinely relapsing or poor treatments promoted in both traditional and integrative medicine.** No other book on this topic is based on over a thousand top research articles, and no one has published anything remotely close to replacing this work in over five years.

When Traditional Medicine Fails...

YOUR GUIDE TO MOLD TOXINS

Gary Rosen, Ph.D. & James Schaller, M.D.

- WHAT THEY ARE
- WHO THEY HURT
- AND WHAT YOU CAN DO TO RECLAIM YOUR CHILD'S HEALTH, LEARNING AND BEHAVIOR

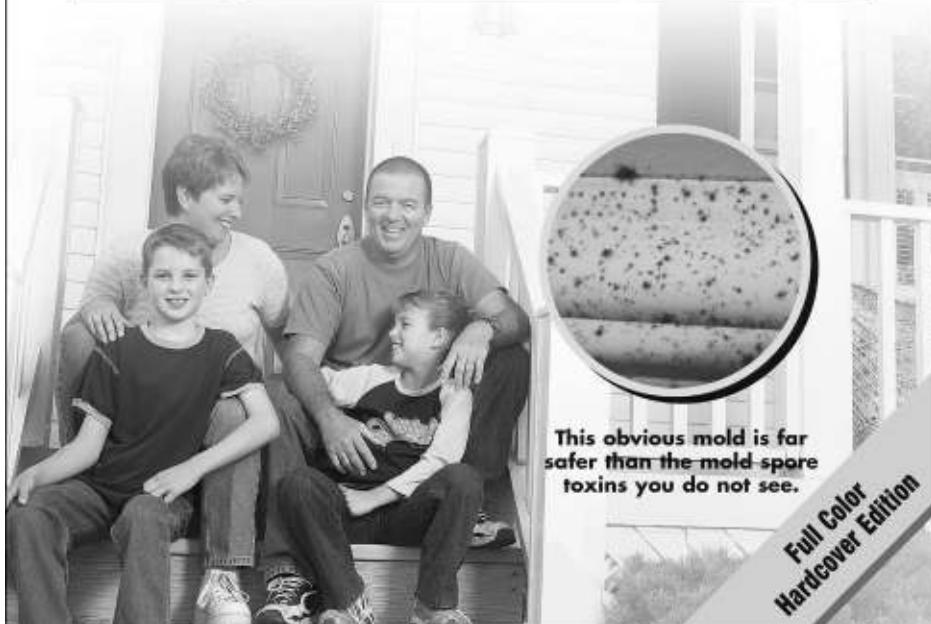

Includes Home
Detox Program

Dr. Schaller is a Certified Mold Investigator and a Certified Mold Remediator. Here is a practical and readable mold mycotoxin book.

JAMES SCHALLER, M.D., CMR GARY ROSEN, PhD, CIE

MOLD ILLNESS AND MOLD REMEDIATION MADE SIMPLE

Removing Mold Toxins From Bodies and Sick Buildings

This book is helpful for people who are ill, or have trouble thinking and reading science materials. This is very practical and shows the clean-up errors made by 95% of experienced and expensive licensed mold remediaters and renovation workers. Just reading ten pages from this book has shown people why they are not getting better. And this text helps you spot poor remediaters after simply reading 40 easy to understand comics. Most remediations fail and most building hygiene actions are flawed. See why fast. **The six best mycotoxin binders cannot cure you if you are still in a “sick” home or moldy work location.**

JAMES SCHALLER, M.D.

SUBOXONE

**TAKE BACK YOUR LIFE
FROM PAIN MEDICATIONS!**

The only current, practical and advanced clinical book on this revolutionary treatment for opioid addiction and modest pain.

JAMES SCHALLER, M.D., M.A.R.

A.D.D. IRRITABILITY AND OPPOSITIONAL DISORDERS

CUTTING-EDGE SOLUTIONS

SINCERE THERAPISTS AND DOCTORS MISS

The many missed **medical and neurological** causes of poor focus and bad behaviors can no longer be ignored. This unique text advances medicine and shows how much in youth psychiatry has medical roots that are ignored or unknown even in solid child and adolescent psychiatry practices.

CHECKLISTS FOR BARTONELLA, BABESIA, AND LYME DISEASE

2012 EDITION

A "BEST DOCTOR", "PEOPLE'S CHOICE PHYSICIAN" AND "TOP DOCTOR" OFFERS HIGHLY RESEARCHED, ADVANCED DIAGNOSTIC CHECKLISTS FOR DANGEROUS EMERGING INFECTIONS

Which Physician is Going to do a Proper Exam of a Person With Bartonella, Babesia, and Lyme Disease?

The right physician is the one who is going to take the time for a very comprehensive evaluation

JAMES SCHALLER, MD, MAR & KIMBERLY MOUNTJOY, MS

The only tick and flea-borne infection diagnostic checklist book based on over 6,000 references related to Bartonella, Babesia and Lyme disease. It seeks to prevent false negative diagnosis, meaning, the advanced and expanded criteria are set to catch these three infections. This book is available from www.personalconsult.com under "free books" or from Amazon.com.

The book cover features a large, bold title "SOBRIETY TESTING" at the top. Below it is a subtitle: "THE BASIC SCIENTIFIC AND MEDICAL REFERENCES THAT DEMONSTRATE STANDARDIZED FIELD SOBRIETY TESTING IS PRACTICING MEDICINE WITHOUT A LICENSE". To the left of the subtitle is a black and white photograph of a smiling man in a white lab coat and stethoscope around his neck, holding a clipboard. To the right of the subtitle is a circular badge with the text "CITATION ONLY TEXTBOOK". At the bottom of the cover, the authors' names are listed: "JAMES SCHALLER, M.D., M.A.R." and "KIMBERLY MOUNTJOY, M.S."

This firm book is a strong appeal for all involved in preventing impaired driving, which often causes profound disability and death, to appreciate the medical testing done on dark sidewalks or streets is a practice of advanced medical testing. FST has hundreds of routinely missed medical troubles which cause false positive tests. All civilized societies must lower the many arrests based on a lack of knowledge in human physiology and human pathology.

Further, the simplistic teaching that field sobriety testing is very easy for sober people is wrong. How many adults can walk on a balance beam a mere few feet off the ground?

WHAT YOU MAY NOT KNOW ABOUT BARTONELLA, BABESIA, LYME DISEASE AND OTHER TICK & FLEA-BORNE INFECTIONS

IMPROVING TREATMENT SPEED,
RECOVERY & PATIENT SATISFACTION

**Beyond 1990's Simplistic Medicine And Its Dangerous
Protocols Which Are Untailored Treatment "Recipes"**

JAMES SCHALLER, MD, MAR & KIMBERLY MOUNTJOY, MS

ABRIDGED EDITION

This powerful book is from one of the highest rated physicians doing research on all major tick infections. He only treats people who have failed to be cured by a number of previous smart healers. It is a book of ideas proposing reasons you do not feel recovered and back to normal. This book has over 90% of its references removed which are still in the first edition if you are a researcher who is ill or have family, friends or doctors mocking your careful science reflections.

An Extensive Collection of Academic References Focused on Emerging Babesia and Malaria Treatment Options

Citations on Current and Emerging Treatment
Science for Researchers

A PURE CITATIONS TEXTBOOK

James Schaller, MD, MAR
Kimberly Mountjoy, MS

This is a researcher's textbook for MD's, DO's, PhD's and Master's of Science working directly in Babesia and malaria research. It has no use for patients, unless they also are full-time researchers in this exact area of advanced academic research.

Disclaimer

Dr. Schaller is not a specialist in infectious disease medicine. He is also not a pathologist. Both of these specialties have over 2,000 diseases to treat and study. Dr. Schaller is only interested in four infections and has read and published on only these four. The medical ideas, health thoughts, health comments, products and any claims made about specific illnesses, diseases, and causes of health problems in this book are purely speculative, hypothetical, and are not meant to be authoritative in any setting. No comment or image has been evaluated by the FDA, CDC, NIH, IDSA or the AMA. Never assume any United States medical body, society, or the majority of American physicians endorse any comment in this book. No comment in this book is approved by any government agency, medical body or medical society. Nothing in this book is to be used to diagnose, treat, cure or prevent disease. The information provided in this book is for educational purposes only. It is not intended as a substitute for the advice from your physician or other health care professionals.

No patient should use the information in this book for the diagnosis or treatment of any health problem, or for prescription of any medication or other treatment. You should consult with a health care professional before deciding on any diagnosis, or initiating any treatment plan of any kind. Dr. Schaller does not claim to be an expert in any illness, disease or treatment. In this book, he is merely sharing one of his interests. Please do not start any diet, exercise or supplementation program, or take any type of nutrient, herb, or medication, without clear consultation with your licensed health care provider.

Bartonella diagnosis or treatment comments and reports of possible positive or negative treatment outcomes are hypothetical. No treatment should be rejected or embraced by anyone, based on the preliminary research and study in this book.

Contacting Dr. Schaller

Should you wish to talk to Dr. Schaller, he offers individualized education consults, which can be arranged by calling 239-263-0133. Please leave all your phone numbers, a working email and a fax number. These consults are typically in 15 minute units and can last as long as you wish. All that is required is the completion of a short informed consent form.

If you would like a full diagnostic consult or to see Dr. Schaller as a patient, know he treats patients from all over the USA and from outside the country. He meets with you first and then does follow-up care with you by phone.

If you would like to fly in to see Dr. Schaller, his staff are very familiar with all the closest airports and hotels.
