THE LEGAL USE OF THESE MEDICAL FORMS

THESE FORMS MAY NEVER BE COPIED

ANY COPYRIGHT INFRINGEMENT OF THESE FORMS WILL BE FULLY PROSECUTED.

COPYING ANY OF THESE FORMS WITHOUT PERMISSION IS INTELLECTUAL PROPERTY THEFT.

- 1) Dr. Schaller and your licensed healer who completes this form cannot promise that local law enforcement officers will honor this documentation of your limitations.
- 2) If you are impaired to the point of being at risk as a driver, you cannot drive until you are no longer impaired and able to drive carefully and safely.
- 3) Most states require submitting to a breathalyzer for alcohol and a urine test to determine the presence of illegal drugs. Noncompliance with these tests could result in the loss of your driver's license.
- 4) This form does not replace the counsel of a lawyer who is experienced in your location in DUI/DWI law.
- 5) If you take prescription medications, please be sure these do not impair your ability to drive.
- 6) The courts have yet to fully determine the power of a physician's exam versus the field sobriety testing of a medically unlicensed law officer. If you are markedly impaired on a video tape, and cannot speak on an audio tape, this medical note will probably not add to your defense.
- 7) The creator of this form and your healer will not accept responsibility for any impaired driving for any reason including the use of alcohol or illegal substances. Drive only when you are fully alert. If you drive impaired due to sleepiness, distractions, over the counter sinus medicines, dehydration, or conversations that lower your attention to threats in front of you, beside you and behind you, you could kill yourself, your passengers and others on bikes, motorcycles, cars or on the sidewalks.
- 8) **DRIVING AND FIELD SOBRIETY TESTING ARE DIFFERENT MEDICAL ABILITIES.** Think of ice skating and riding a horse. They require different abilities. Hundreds of medical disorders undermine FST—see *Sobriety Testing*, by J. Schaller, M.D. Please be aware it is approximately 600 pages of medical citations related to balance, coordination, focus, alertness and other requirements needed to complete successfully the exam called “Standardized Field Sobriety Testing” or SFST.

- 9) Many states refuse to allow non-law enforcement people the ability to learn or watch the teaching of field sobriety testing procedures. Other states welcome people like Dr. Schaller to participate in FST observation or training. These states and officers are closer to being “free and pro-liberty officers and states.”
- 10) The USA is the leading jailor in the world, so we need more liberty. This form is an attempt to decrease errors and false arrests. Since in some states you cannot tape or videotape a law officer, we need checks and balances on the immense power of law enforcement, while at the same time limiting death or severe disability by the people who are drunk or using illegal drugs, who use a car or a truck as a weapon of disaster.

Most arrests happen when you are driving.

Most accidents involve an impaired person.

Assume others are driving wrecklessly.

Never drive unless you are 100% functional.

No destination is worth your life or the life of others.

INTRODUCTION

Our staff have met many individuals in the last fifteen years who failed field sobriety testing, and yet were not impaired drivers. They may have been dehydrated waiting in the hot back seat of a city police cruiser parked on black tar. Or the person waiting with steel handcuffs was very tired, hungry or afraid. Many had no alcohol consumption in days, and this was documented by breathing devices showing zero alcohol. But they were still arrested for being an impaired driver. Why? Because they failed field sobriety testing. So it was believed they were on illegal drugs, which days later did not show up in their required urine or blood testing.

Some would say they “won,” but they never got back a sense of peace as a driver, they had tools, expensive firearms, and other costly items taken out of their car—the only way to get them back was a costly round of court dates. So they were robbed by law enforcement. They were victims.

Another group of victims have been “attacked” by impaired drivers. Do you have friends or relatives disabled or dead due to an impaired driver?

So this book is meant to walk the “middle way.” Law enforcement must never arrest drivers casually, and drivers should not drive casually.

Drive only when you are fully alert. And if you are even slightly physically limited—document it. These forms are probably the best way, at this time, to escape field sobriety testing. These doctor and law officer approved forms may help you escape an unwanted arrest for drug use or alcohol impairment. They may save your liberty.

MEDICAL EXCUSE NOTE FOR FIELD SOBRIETY TESTING (FST)

Version 1 (8 copies)

MEDICAL EXAMINATION NOTE

Dear Law Enforcement Officers,

Patient _____ is currently under my care for the following illness _____ . It has been my experience that the disease and medications can greatly impair patient's balance and coordination. In my office I routinely use the following tests (heel to toe, one leg raise & nystagmus of eyes) to determine degree of illness and neurological involvement.

On _____ this patient was examined in my office. Prior to examination the patient exhibited no signs of being under the influence of alcohol or dangerous drugs. In a controlled environment under my care this patient failed to perform less complex testing than field sobriety testing.

Due to the patient's illness and current treatment plan, the patient will most definitely fail the Field Sobriety Tests (FST) listed below:

HEEL TO TOE

ONE LEG RAISE

NYSTAGMUS OF EYES

Failed SFST: _____ (A check here means this patient failed a simplified version of the SFST in my office when I performed my licensed medical exam.)

Patient Name: _____

DOB: _____

Date: _____

Examined by: MD / DO / NP / PA / ND _____

Address: _____

Phone: _____ License No. _____

Sample Medical Reason(s) for FST Failure (optional) _____

MEDICAL EXCUSE NOTE FOR FIELD SOBRIETY TESTING (FST)

Version 2 (8 copies)

MEDICAL EXAMINATION NOTE

The Patient Handing You This Note Failed Simplified Field Sobriety Testing

A Medical Practitioner Report of Failure to Perform SFST

To: **Law Enforcement Officers**

Date: _____

Patient Name: _____

DOB: _____

This person failed simplified standardized field sobriety testing (SFST) in my office. At that time they did not have any signs of alcohol or illegal drugs use. I believe he/she failed because they have clear **medical problems and/or limited physical capacities** required for these field sobriety tests.

Please use other means to determine DUI/DWI.

HEEL TO TOE

ONE LEG RAISE

NYSTAGMUS OF EYES

Failed SFST: _____ (A check here means this patient failed a simplified version of the SFST in my office when I performed my licensed medical exam.)

Signed: _____ MD / DO / NP / PA / ND License No. _____

Sample Medical Reason(s) for FST failure (optional): _____

MEDICAL EXCUSE NOTE FOR FIELD SOBRIETY TESTING (FST)

Version 3 (8 copies)

PHYSICIAN NOTE

DOCUMENTING FAILURE OF FIELD SOBRIETY TESTING

Dear Officer,

_____, who is my patient, was unable to clearly complete these three tasks below which are less medically and neurologically challenging than the National Highway Traffic Safety Administration's Standardized Field Sobriety Tests (SFST or FST).

Please excuse this patient from these tests—he or she fails FST type physical tests when sober and without any medical evidence of illegal drug use when examined by me.

HEEL TO TOE

ONE LEG RAISE

NYSTAGMUS OF EYES

Signed: _____ License No. _____

Sample Medical Reasons for FST failure (optional): _____

Printed Name: _____

Date: _____

MEDICAL EXCUSE NOTE FOR FIELD SOBRIETY TESTING (FST)

Version 4 (8 copies)

MEDICAL EXAMINATION NOTE TO LAW ENFORCEMENT

ALERT! THIS PATIENT CANNOT DO STANDARDIZED FIELD TESTING

THIS PATIENT FAILED SIMPLIFIED FST

To: Law Enforcement Officers

Date: _____

Patient Name: _____

DOB: _____

This patient was examined in my office and failed to perform an exam less complex than field sobriety testing. This patient had no signs or symptoms of alcohol or illegal drug use in my exam.

This patient will fail FST due to medical limitations.

HEEL TO TOE

ONE LEG LIFT

NYSTAGMUS OF EYES

Failed SFST: _____ (A check here means this patient failed a simplified version of the SFST in my office when I performed my licensed medical exam.)

Signed: _____ MD / DO / NP / PA / ND

License No: _____

Sample Medical Reason(s) for FST failure (optional): _____

Contacting Dr. Schaller

Should you wish to talk to Dr. Schaller, he offers individualized education consults, which can be arranged by calling 239-263-0133. Please leave all your phone numbers, a working email and a fax number. These consults are typically in 15 minute units and can last as long as you wish. All that is required is the completion of a short informed consent form.

If you would like a full diagnostic consult or to see Dr. Schaller as a patient, know he treats patients from all over the USA and from outside the country. He meets with you first and then does follow-up care with you by phone.

If you would like to fly in to see Dr. Schaller, his staff are very familiar with all the closest airports, and we have special hotel discounts.

I wish you the very best health!

Warm Regards,
Rona C. MBA
Office Manager

TAKE FIVE MINUTES TO PREVENT A NIGHT IN JAIL! **CLEAR MEDICAL FORMS THAT PROVE YOU CANNOT** **PASS FIELD SOBRIETY DRUNK TESTING**

DO YOU BELIEVE IN THESE COMMON MISPERCEPTIONS?

*** FIELD SOBRIETY TESTING IS EASY**

If They Were Easy No "Cheat Sheet Notes" Would be Sold to Florida Officers.
Police and Sober People Fail These Tests Unless They Are Practiced.

*** POLICE, SHERIFFS AND STATE TROOPERS GET NO REWARDS FOR ARRESTING YOU**

Some USA Stations are Literally Arrest Factories.

*** AMERICA IS A VERY FREE NATION WITH IMMENSE LIBERTY**

The USA is the Top Jailer on Earth, so Liberty is Declining.

*** STREET "DRUNK" TESTING BY LAW ENFORCEMENT IS SCIENTIFIC**

85% of Dr. Schaller's Sober Patients Fail FST.

The "Science" Supporting Street Medical Exams is Junk.

*** THESE TESTS ONLY HAVE A FEW PARTS**

A Neurology Dissection Shows over 30 Commands in this Type of Testing.

*** THE VIDEO OF YOUR HEEL-TO-TOE TEST AND ONE-LEG RAISE TEST WILL HELP YOU**

Only Gymnasts and Ballerinas Look OK. You Will Look Stupid.

Dr. Schaller is the author of 33 Books, 27 Top Journal Articles and is a full-time researcher who primarily treats patients with complex medical problems. He routinely finds creative clinical solutions to help people with a wide range of medical troubles who come to his office from all over the world. Dr. Schaller's average patient has previously sought help from five to over a hundred physicians without recovery.

Since he cannot stand to see suffering ignored, over the years, he has become recognized as someone who helps people who have clearly failed to recover in many types of medical systems. He loves a challenge and he cares deeply about his patients. His publications are in at least a dozen languages.
